

Submitter: Jill Brandt
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

Citizens in within the local community vote for school board members according to the needs of that specific community. The community can petition the school board to guide the curriculum in the way they feel is best and most appropriate for the education of the students in their community. This bill would take away the voices and votes of the people in the community by removing some of the decision making power from the school board members. Also, there should be a certain amount of "censorship" when it comes to children - there are things that are simply not appropriate or necessary for children in various stages of development and some children are being exposed to things at too young of an age, before they are developmentally ready to comprehend and process those things. And there are certain explicit, vulgar and perverse things that no child of any age should be exposed to that are being infiltrated into the government schools. Nothing of any sexual nature should be taught to a child in a government school aside from basic, correct anatomy and physiology. Anything else is the right and responsibility of the parent to teach to their child at the time and in the way that is appropriate for that child. I oppose this ridiculous bill.
