

Submitter: Diannah Dolby
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

Thank you for your time and efforts to work with the whole population of our blessed state. I vehemently oppose this bill. This bill takes equal rights and love they neighbor to a new unconstitutional level. By the mere suggestion of 'stimulate the development of nondiscriminatory courses of study or parts of courses' this bill is at risk for infringing on the public's religious freedoms.

I also feel that an unassociated distant group of people cannot properly determine the needs of a particular community. That is why the school board exists and the decision of implementing new courses of study should always fall to the community parents and school boards. A good example is our Federal Constitution and how it relegates certain powers to the federal government and the rest to the states - because the states know best the state needs. Similarly, the states need to relegate the individual communities with the larger share of and power to those elected, appointed, and living in each communities.

Please keep the distant bureaucracy out of our school, by voting no on SB 1583.
