

February 15, 2024

To the Joint Committee on Transportation,

Commute Options supports HB 4067. This legislative change supports our work to increase access to transportation options across Oregon.

Oregon law has not kept up with the rapid changes of e-micromobility devices as it pertains to safety, education, and use on roads and public spaces. Safety for all road users is an increasing concern as more of these devices enter the public space.

Please support HB 4067 so the task force can examine how e-micromobility devices should be used on existing roadways, bicycle infrastructure, multi-use paths and public spaces and look at how e-micromobility could be part of ODOT administered education and certification programs.

Sincerely,

A handwritten signature in black ink, appearing to read "B. Potwin", is written over a light blue horizontal line.
