Committee: Joint Committee On Ways and Means Subcommittee On Capital
Construction

Measure: HB5201

I am in support of passing this passed. I would qualify today if I needed assistance and funds were available to disperse. These are an excellent funding resource that should give back to the community they are derived from. To help those in dire need. I have been a recipient when I needed help for my rent. Sustaining my home with small children was made possible because of funding .
