

Submitter: Clair Klock

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: HB4083

Senator Sollman and members of the committee,
I'm Clair Klock from Corbett, OR. I urge your support for for HB4083. Others have expressed the pros and cons of the bill. Let me emphasize that this is another step up to the plate to help alleviate the effects of climate change. We need to show future generations that we care what happens to them. Let it not be said that we did not do our level best to address this critical planetary issue. Let us set the example.
Thank you for your work.
