

Submitter: Jessica Scheer

On Behalf Of:

Committee: Senate Committee On Rules

Measure: SB1548

I oppose this measure. Having a time difference between Washington and Oregon and California would cause issues with individuals who work remote or work with others in those states. Additionally, working with people across the country would be a four hour difference 8 months of the year. Permanent daylight savings is preferred but I recognize this has stalled in Congress. I'd rather keep it the same than move to permanent standard time. Oregonians work closely with people from WA and CA and being in a different time zone 8 months of the year would be challenging.
