

Submitter: K Olson  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: SB1548

I am very opposed to this - without the rest of the country making the same switch, this would put Oregon (and the other states this is now tied to) at least two hours behind the next time zone for the majority of the year, and FOUR hours behind the East coast. That will be very detrimental to many businesses and workers whose work is tied to other parts of the country, particularly New York City and DC.
