

Submitter: Mike Badzmierowski
On Behalf Of:
Committee: Senate Committee On Rules
Measure: SB1548

I am submitting testimony to oppose SB1548. I would rather keep switching the clocks twice a year to maintain our late day light during our summers. It does not make sense to the majority of Oregon constituents to have daylight beginning before 5AM during peak summer and reducing our latest sunset to just after 8PM. Previous bill passing of making daylight saving time permanent made sense to preserve daylight after most Oregonians get off work. However, this new bill making standard time permanent just because it is the easiest path to avoid US Congressional approval lacks foresight and truly seeking what Oregonians want. I would approve the continuation of making daylight saving time permanent or keep switching the clocks twice a year. I DO NOT approve taking daylight away from Oregon's beautiful summer nights.
