

Submitter: Marc Buxton
On Behalf Of:
Committee: Senate Committee On Rules
Measure: SB1548

Honorable Senators:

I am one citizen in full support of SB1548 to maintain standard time for the Pacific Time Zone.

As a cattle raiser the animals do not know about the change of time and it takes about 2 weeks

before their habits can be changed to reflect the time changes. Also with changing to daylight savings time, means the school kids are getting up and catching the bus an hour earlier in the dark (by actual sun time).

They may be more lethargic while at the bus stops and not be aware of potential traffic danger around them, as well as

the drivers themselves may be a little groggy driving to work at this new time.

Notwithstanding is the pain of changing all the clocks not only in the house but all the cars, trucks, shop, and barns.

Please conclude the best way forward with our time is to simply maintain Standard time.

Thank you.

Respectfully,

Marc Buxton
