

Submitter: Chris Mack

On Behalf Of:

Committee: House Committee On Business and Labor

Measure: SB1596

We urge you to do whatever it takes to pass it this year. I am so tired of the perspective of the throw away society. The right to repair electronic equipment will benefit all Oregonians and our environment. Making repairs easier and more accessible and affordable to consumers, keeping electronic waste (with its toxic heavy metals) out of our landfills, and reducing the need for a shrinking supply of raw materials.

Further, we urge you to consider expanding this type of legislation to home appliances, farm equipment, medical equipment, and more in the 2025 session.
