

Submitter: Trenton DuVal

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: HB4083

I strongly support divesting Oregon's money out of coal. Not only does burning coal damage our state's long term prospects by polluting the air, adding to climate change and threatening other natural resources, but also the coal industry is in decline, for a number of reasons, and will soon be an investment area full of stranded assets. For our planet, our people and our fiscal prosperity, it makes sense to dump coal from Oregon's investment portfolio.

Thank you for your attention.
