

Submitter: Robert Mohr

On Behalf Of:

Committee: Senate Committee On Health Care

Measure: HB4130

I am a physician who practices in multiple states. I am an emergency physician, and I am strongly opposed to large multi state health care organizations that have made it impossible for me to practice compassionate medicine. I believe that physician control of practice is vital, and that autonomy should be maintained at a local level where the community can have a direct impact on the success and failure of that organization. These large, multi state corporate entities have dehumanized medicine and tried to make doctors into something resembling assembly line workers. It's gross. There is actually a decent amount of money in medicine when it's practiced appropriately however, corporations have a fiduciary duty to put shareholders ahead of patients by law and as such have created crises that are not only unnecessary, but completely preventable. This is incompatible with the ethical delivery of medicine.
