

Submitter: Divyang Joshi
On Behalf Of:
Committee: Senate Committee On Health Care
Measure: HB4130

HB 4130 effectively ensures physicians remain in control of patient care and protects against corporations and private equity companies owning or indirectly controlling medical practices and the decisions of healthcare providers.

This bill is crucial as corporations should not be practicing medicine (eg. hiring and firing physicians when we advocate for patients, pushing physicians on "production" for external profits, determining staffing (eg how NPs and PAs are used), controlling or manipulating testing and interventions, billing with the physician's license without any transparency to the physician.

These corporations undermine the physician-patient relationship. It's already difficult enough to fight with insurance companies. Please pass this legislation so physicians don't have to fight against another set of corporations so patients get the care they need, not the care that serves a corporation's financial interests.
