

Submitter: Brittany Speed  
On Behalf Of:  
Committee: Senate Committee On Health Care  
Measure: HB4130

Dear Senators,

I am an emergency medicine physician writing in strong support of HB4130, a bill that would stop corporations from affecting how we, oath bearing physicians, practice medicine. Those who have no experience in the day ins and outs of how our specialty field operates, how our patients are affected by policy and metric changes, and have no experience bedside explaining to a patient why a loved child has died today exactly 5 minutes prior to entering a room where said physician would get berated for taking too long and still be polite... should not have the capability to affect our care so directly by ignorant policy change. Physician directed care and policy change remains valuable and an under utilized resource. One that if not taken seriously, will result in a total catastrophe where profit driven medicine supersedes passionate and efficient medical care. Physicians should be able to make these types of decision, as they should be running the corporation, so that the patients and medical professionals best interest are kept in mind.
