

Submitter: Muriel Solberg  
On Behalf Of:  
Committee: Senate Committee On Health Care  
Measure: HB4130

Lay-corporations should not be practicing medicine. As a physician in training, it is already incredibly obvious that things that are good for corporations and business are often directly opposed to what is good for patients. I became a physician to take care of patients and always put their best interest first. I am an emergency room doctor and it is my goal to provide high-quality care to every patient I see regardless of insurance-status or ability to pay. To name a few examples - having lay corporations manipulating and controlling what tests a physician can order or determining how a medical unit is staffed will never benefit patients. I hope Oregon can be a leader in affirming that health care should always prioritize taking care of patients over making profits for corporations. I support HB4130. Thank you for your work on this important issue.
