

Submitter: Regina Winkler

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

It is not compassionate to addicts or to the community to allow addicts to live on our streets in a state of addiction. Our law enforcement must be given the tools to incarcerate or move to a rehab facility in a timely manner. There should be no right to live on our streets in a state of addiction. The current state of things has resulted in the largest death rate of addicts among all the states. This is inexcusable and is not helping addicts but enabling addicts to die in our streets in increasing numbers. In the throes of addiction addicts are not capable of making decisions for their health so the state must step in and end this holocaust as well as incarcerating the drug dealers in a timely manner. Please do your duty and help save lives by amending this ill-conceived law!
