

Submitter: Gary Hartman

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

Drugs are destroying this country, the young and old who slip into this horrible mess become useless to themselves and society.

Often they become criminal as well as useless!

This single thing promotes crime to an extent never seen before, it is the one scourge on our country that must be stopped in order to hold onto the decent path of society.

You cannot point to a single positive for drug use, and Oregon has been the foolish lead towards making it easy, the stupidity of this is obvious to all with common sense.

Get people off drugs, and into a path towards redemption, and learning skills to further the positive direction of our country.

Drugs lead to a total collapse of society, making our country a toilet!!

End it now!!
