Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

Homeless shelters report no accountability to motivate drug affected individuals into drug treatment so the problem continues. Especially vulnerable are children of drug addicted parents. These individuals need help to help themselves and they are always thankful later.

We are wasting tax dollars by enabling these behaviors and increasing crime.

I cannot sell my home because of the homeless community in my neighborhood. Even though it's by a park and elementary school, the city doesn't address their drug use or move them. Safety and property values are at stake but no one cares. Can we sue the city? They should be responsible for their actions too.
