

Submitter: Sha Osten  
On Behalf Of: PHYSICIANS  
Committee: Senate Committee On Health Care  
Measure: HB4130

Physicians are fed up, quitting, and retiring early due to decisions being made by medically uneducated people in suits. Quality medical care is harder and harder to find and will only get harder if something is not done SOON. Save your family and constituents from poor quality care or worse- nonexistent care- in the future. Patients only suffer when physician experts are ignored by corporations.

Also support bill regarding all costs be included for meds, deductibles and patient costs. Physicians are forced to practice inappropriately when patients cannot afford the tests that are recommended. many many patients cannot afford the coinsurance involved for basic testing This has been worsening every year and is dangerous for a physicians ability to practice good medicine and a patient's ability to afford the advised testing.

Thank you!

A very concerned physician, MD, real doctor !
