

Submitter: Mark Zauner

On Behalf Of: People suffering from lost livability

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

We absolutely must criminalize the sale, possession, and public use of these hard drugs. It is very, very clear to those of us living in this state that simply offering treatment is entirely too soft-handed. It is no wonder crime has spiraled out of control - we are letting the drugs win by allowing people to become very addicted and not helping them. Please end this madness and support the bills that will criminalize these behaviors with a minimum threat of 6 months jail time...but with diversion options for those who are willing to get better.
