

Submitter: Ron Heiden

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

The experiment to lessen crime and drugs on our streets has failed. Maybe in the future we'll come up with a better response that actually works but we don't have that now and people are literally dying while we debate the issues. Make hard drugs illegal again, give the police the power to stop someone from smoking fentanyl in public. Get the drug dealers off our streets and away from us and our children. Put them in jail where they belong. The experiment has failed miserably and it need to stopped now.
