On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

I live in NW Portland and have worked in downtown Portland for 30 years. I commute by bike and see things first hand. The drug problem was bad and then covid and the decriminalization happened and I started seeing people sell and use drugs openly everyday. In the past two years I have seen more and more folks wandering the streets so high they have no touch with reality. I see the drug dealers too, daily. Please recriminalize open drug use, please make it easier for police to do their job. Please give us our city back.
