

Submitter: Frances Li

On Behalf Of: Oregon

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

I have two 20 year old children addicted to fentanyl and meth. They have been to detox 7 times after 3 measly days they are given meds and kicked out of the bed knowing that it takes 10-20 days to detox from fentanyl. Since they are not given the time to recover they get out and go straight to the cheapest drug on the street where they can buy pills less then 50¢ each. I can't take my grandson anywhere without someone smoking dope or passing out on the corner. This measure 110 has done nothing but harm the community and leave parents struggling to get the help their families need.
