

Submitter: Patrice Godfrey

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

I have lived and worked in the area for over twenty years. The lack of law enforcement and passing of Measure 110 have created problems which have become monumental. There are homeless and drug addicted people wondering around, engaging in theft and other criminal activities.

The reason I am supporting HB 4002 is there needs to be something done about this issue of being able to do drugs by churches, schools and the like without any thought or concern with regard to the unintended consequences and how the majority must suffer for the minority. Not to mention, there is nothing compassionate about allowing people who are addicted to die in the streets or allowing mentally ill and addicted walk out into traffic and get killed.

I work in a building near The Round and there were homeless and mentally ill people walking around our building, so we had to lock our suite door and install a doorbell.

Measure 110 is a complete failure and needs to be amended.
