

Submitter: Abigail Rotholz

On Behalf Of: Addiction is not a crime

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

"I am disappointed to see state leaders pursue harmful criminalization policies instead of taking meaningful action to increase access to treatment services and housing for Oregonians.

I urge lawmakers to follow the evidence and the data: decades of the failed war on drugs tell us that sending people to jail for having an addiction only ruins lives.

HB 4002 -24 embraces a dangerous and damaging criminalization approach at the expense of the safety, health, and well-being of Black and brown communities. I strongly oppose HB 4002 for failing to consider the Oregonians most at-risk of over-policing and government harm: Black and brown people, Indigenous Oregonians, low-income Oregonians, and rural Oregonians.

The latest version of HB 4002 -24 creates massive inequities between counties. People who live in counties without a deflection program will face immediate HB 4002 arrests while people living just a few miles away will be offered connection to treatment. Your zip code shouldn't determine your ability to access treatment services. An easy fix to this would be to simply require all counties to set up deflection programs.

HB 4002 -24 sets deflection programs in select counties up to fail - in the same way Oregon failed to implement Measure 110. For lower income Oregonians, the shortage of public defenders means cases will be dismissed with no connection to care, but leaving people with arrest records. And HB 4002 -24 recriminalizes addiction long before deflection programs will be set up.

HB 4002 -24 also falls short of investing in Oregon's woefully under resourced mental health and drug addiction treatment services. The status quo of providing just 50% of the capacity necessary to meet the substance use disorder services needed is unacceptable. People are desperate for treatment services. That's punishment enough - putting them in jail doesn't help anyone.

We must do better. And we must do better than HB 4002 -24

At the end of the day, addiction is a health issue. Not a crime. The addiction crisis demands action, but HB 4002 -24 does more harm than good. I urge you to press the lawmakers behind HB 4002 to do better and consider the harm this legislation will unleash upon Black and brown Oregonians, and people struggling with addiction."
