

Submitter: Neal Burgess

On Behalf Of: Applicasnt

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

My personal history with drugs is not unusual. Fairly young and with out considering the consequences. Many of my friends died because of drugs. No one planned on dyeing, but many did because; what they took for fun eventually took their lives. This is a life and death decision that is initially in your hands and then the voters. Listen to the successful logic of the past. SEATBELTS. They save lives, you wear one, they are a restraint to keep you safe. There are penalty incentives. Please make the bill strong enough to restrain people from death by applying penalties that will lead to getting professional help.
