

Submitter: Cindy Sawyer

On Behalf Of:

Committee: House Committee On Rules

Measure: SB1538

I would like to oppose this bill because it removes the second test on the voting machines. We currently do not have a well tested voting machine system since the ORVIS system failed the Gartner test and the minimal viable product has not been fully tested for security and effectiveness. Since voting is a very important part of our democratic process, anything that would compromise the validity of voter counts should not be approved at this time.
