

Submitter: Tamara Powell MD  
On Behalf Of: Rural Southern Oregon  
Committee: Senate Committee On Rules  
Measure: HB4130

I am a primary care physician in a small town in Southern Oregon. I believe decisions regarding medical care should be made by a patient and their doctor solely. Corporate management should not be interfering in the exam room. Corporate officers are responsible to their shareholders to make a profit. That leads to the necessity of cost analysis. Non physicians should never have the power to limit medical care in the name of profits for shareholders.
