

Submitter: Caleb Croshaw
On Behalf Of:
Committee: House Committee On Rules
Measure: SB1583

First) Lewd Pornographic content should not be allowed in Oregon public schools. As an Education Major currently in college at an Oregon University, i would not ever want to read some of these disgusting things to my future students. Like things about lube and dildos and gay sex. Some things should simply not be allowed to be in public school libraries. Second) It is the right of the local school board to do content moderation and decide what is in the curriculum and what is not. The state must not overstep here and must allow local school boards to continue making local decisions. Third) Some of these books that the Left wants to protect are too vulgar and graphic to be read at school board meetings, to be read on the radio or television, or to be read in the congress without drawing gasps and criticism. Finally i urge all of you Democrat, Republican or anything in between to vote against SB 1583 to protect our children and to protect our teachers who like myself (an Education Major) think this graphic content has no place in a classroom.
