

Submitter: Robert Egner
On Behalf Of:
Committee: House Committee On Rules
Measure: SB1583

Prohibits Discrimination? It's the majority party that is attempting to discriminate in this case against parents, parents rights and the rights of the citizens to elect a school board to be their voice and stand against this kind of indoctrination materials in our schools. That is the reality here. The majority is attempting to silence the overwhelming majority of parents that absolutely do not agree that pornographic materials should be in our schools. The books that are being pushed aren't educational materials, or simple instructional materials. They are templates to guide our youth towards sexualization of the same sex, towards transitioning away from their born sex, towards not having child birth in their future, towards what has been shown and proven to be very volatile to our youth and shown an increase in suicide and severe mental issues.

You can't simply use indoctrination materials for all our youth because .25% of one percent of the population has the mental fortitude to think they are a cat, a different sex or thinks they like the idea of a strap-on over actual male anatomy. Those parents with those select children should home school and ensure their child has those materials personally and more importantly get them into counseling. Not push the ideology onto the other 99.75%.

When did we stop trying to help our youth with mental illness and instead start indoctrination them and allow them to slide further into their state of illness? Further towards suicide? Accept the issue rather than treat them?

Our outlook has changed because we've allowed these Marxist ideals into our educational facilities hell bent on the destruction of our culture and religions. We've removed honest programs and replaced them with evil schemes of indoctrination.

This Senate bill needs to die and needs to be removed for good never to even be looked at again and a new one made completely against the sexualization and raping of the minds of our youth!
