

Submitter: Lindsey remme

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB4130

I am a physician. Corporations have no place in the care of patients. Allowing business corporations to dictate care is a disservice to patients and to the Healthcare professionals who have spent years training. Also corporations place profit above people. If your family member is dying, you don't want a business man deciding the care that family gets. We don't ask corporations how to safely land an airplane! Don't ask them to be in charge of saving lives.
