

Submitter: Benjamin BenBaruch

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB4130

The issue is very simple. Health care should be delivered by health care professionals based on patients' needs. Shareholder profits should not be a factor in determining the advice and care provided to patients.

We have a very expensive mediocre health care system because medicine is driven by the profit motive rather than by the needs of patients. Don't allow this profit-driven system to get worse.
