

Submitter: Collin Stackhouse

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB4130

A new review led by University of Oxford researchers and published this month in The Lancet, has concluded that hospitals that are privatized typically deliver worse quality care after converting from public ownership.

We can not afford to worsen our chances of a healthy state by allowing private investors to take control of our clinics and health systems. Please pass HB 4130, and keep the control of our systems in the hands of the people providing and receiving care.

Thank you!

-Collin
