

Submitter: John Woods  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: SB1583

This is another typical Democrat busy body bill pretending they are working for the good of Oregon, while blocking parents rights to screen and monitor what their young children in Oregon are exposed to. The Democrats throw up a great smokescreen about books being banned yet they do not or will not allow school boards to prevent pornographic material being not only accessible but required reading for young children.

I think each and every Legislator who votes to pass SB1583, be personally liable for the damaged psyches and problems caused by these materials. The state wants to play parent or guardian then they should shoulder the burden of repairing the damage their interference causes.

The Oregon Legislature in particular should focus on state problems, not take on more idiocy like Measure 110. In other words " Do your damn job and leave the kids alone." All your bureaucratic buffoonery has created more problems than it solved, especially when you delve into citizens rights and what their children are taught. Unless you are in favor exposing young children to pornography I ask you to vote not only no but hell no on SB1583.
