

Submitter: Cynthia Mendez-kohlieber

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB4130

I am a practicing family medicine physician in California, and I strongly support a bill that allows physicians and other healthcare providers to be the leaders of clinical care for a patient. Corporations should not be able to dictate the care of that patients obtain, corporations are not physicians, corporations, by definition are in debt to their shareholders. They do not have a patient's best interest at heart, they have profit at heart. Clinical care should only be directed by a physician or healthcare provider
