

Submitter: Gary West  
On Behalf Of: Parents and students  
Committee: House Committee On Rules  
Measure: SB1583

Intrusion by those outside of home should never be allowed to dictate what children are exposed to. Materials not suited to those under 18 yrs of age i.e. sexually explicit text and pictures are leading children to more confusion and mental health problems that last a lifetime. Stick to basics math without racial or serial bias. English that teaches grammar not ideology and science that is actual science and not the false science practiced by some so called professional. PARENTS ARE IN CHARGE AND THE STATE, COUNTY or others not directly involved in feeding, caring or disciplining their child needs to STAY OUT.
