

Hello, my name is Fletcher Brower and I have Von Hippel Lindau disease. This disease caused me to get tumors in my eyes that made me start going blind. If it had not been for Dr. Peter Karth who is a leading specialist in the country for eye and retina care I would most likely have gone blind. Please support HB4130 so doctors like Peter Karth are able to provide very necessarily medical care to those in dire need without having to drive out of town.
