Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal
and World Affairs

Measure: SB1548

Daylight savings needs to go! I live on a farm and ALL the farm animals do not do "time change" and feeding them an hour later or an hour earlier is extremely stressful on the animal's! It can cause colic which can result in death! Animals have a built in time clock and this really throws them off!! Then it affects my bodies time clock and my schedule and it takes me months to adjust.
