

Submitter: Jeffrey Placencia  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: SB1548

Hello,  
I'm writing to urge a no on SB 1548.

While I understand the push to end the switching between times twice a year as it can lead to bad outcomes in health, I think it's terrible to opt for the time that removes the most daylight from the later hours of the day. I know year round Daylight Savings require congressional approval, and yes, that kind of consensus is a difficult one in this political climate, I think among more and ONLY opting for Daylight would make sense as California and Washington has not made any move towards keeping Pacific time as the consistent time. While I admire Oregon for going it's own way and sticking out in novel and positive, new and sometimes challenging ways (hello measure 110), this is just going to be annoying when operating with businesses out of state - especially on the west coast. Especially when we have a good part of Portland metro workers residing IN Washington state. Why complicate matters further? Please, no on SB 1548, we have a better solution when we voted to make Daylight Savings years round. Let's aim for that. Thank you.
