

Oregon Motor Voter (OMV) Program Audit Results Summary

House Interim Committee on Rules
September 30, 2025

Audit Objectives & Scope

Objectives:

- Document and assess the effectiveness of processes and internal controls within the OMV Program.
- Verify the accuracy of voter registration data collected and transmitted by the OMV Program.
- Evaluate the efficiency, effectiveness, and security of systems and technology used to manage voter registration data.

Scope:

- Period: Jan 1, 2024 – May 22, 2025
- Agencies: Oregon ODOT (DMV) and Secretary of State (SOS)
- Voter registration transactions, system configurations, inter-agency processes, and supporting records maintained by ODOT and SOS

In-Scope Systems:

Administered By	System
ODOT	Oregon License Issuance and Vehicle Registration (OLIVR)
	MOVEit
	MOVEit Transfer
SOS	Oregon Motor Voter System (OMV system)

Audit Conclusion Overview

Objective: Document and assess the effectiveness of processes and internal controls of the OMV program.

- **Conclusion:** Processes and internal controls are generally effective, but some control gaps and exceptions were noted, indicating opportunities for improvement.

Objective: Verify the accuracy of voter registration data collected and transmitted by the OMV program.

- **Conclusion:** Controls are implemented to mitigate the risk of inaccurate data; however, previous errors, prior to the strengthened control environment, remain unidentified and could potentially lead to inaccurate data being transmitted by the OMV program.

Objective: Evaluate the efficiency, effectiveness, and security of systems and technology used to manage voter registration data.

- **Conclusion:** Systems and technology appear to be appropriately configured, automated, and secured to support the Automatic Voter Registration (AVR) process. However, opportunities exist to enhance user access management and oversight.

Strengths and Satisfactory Results

During this audit, **key strengths** were noted that reflect a commitment to improvement and a proactive approach to program oversight. These strengths include:

- ✓ Strong control environment with proactive improvements.
- ✓ Effective use of automation and secure system configurations.
- ✓ Legislative awareness and continuous monitoring.
- ✓ Culture of accountability and transparency.

Audit areas with satisfactory results and no issues or findings included the following:

Audit Area	Satisfactory Results
Communication, Roles and Responsibilities	Memorandum of Understandings (MOUs) and amendments are current, complete, and aligned with legislative requirements.
OLIVR Configurations and Changes	System configurations align with OMV program requirements.
Daily Control File Reconciliation	Issuance file transfers are accurately tracked and reconciled.
SOS Program Monthly Audit	The monthly audit process is timely, complete, and follows established procedures.

Audit Findings & Recommendations

The audit identified *eight* key findings related to internal controls, documentation, and oversight within the Oregon Motor Voter (OMV) Program. These findings highlight areas where improvements are needed to ensure data integrity, compliance, and operational effectiveness.

Audit findings were noted in the following audit areas:

- **Field Processing – Issuance Transactions**
- **Policy and Procedures**
- **Training**
- **Issue Escalations**
- **Technology – Signature Files**
- **Technology – Failure Notifications**
- **Technology – User Access**

Audit Findings & Recommendations

Audit Area	Findings	Recommendations
Field Processing – Issuance Transactions	Finding #1: (High): Control Gap in Validating Legacy Citizenship Records	Recommendation: Require documentation for citizenship verification.
	Finding #2: (Moderate): Lack of Evidence for Form 173DP and OLIVR Review Controls	Recommendation: Implement sign-off procedures for review controls.
Policy and Procedures	Finding #3: (Moderate): Incomplete Policy Evaluation Cycle and Federal Legislation Tracking	Recommendation: Centralize policy review and legislative tracking.
Training	Finding #4: (Moderate): Lack of Formalized Policy for Annual OMV Program Training Requirements	Recommendation: Document annual training policies; expand SOS training.
Issue Escalations	Finding #5: (Moderate): Lack of Formal Issue Escalation Process for the OMV Program	Recommendation: Create a centralized escalation protocol.
Technology – Signature Files	Finding #6: (Moderate): Incomplete Documentation of Outbound Signature File Transfers	Recommendation: Ensure system logs capture outbound timestamps.
Technology – Failure Notifications	Finding #7: (Moderate): Lack of Formal Process for Tracking and Resolving System Failure Notifications	Recommendation: Track and resolve failure notifications formally.
Technology – User Access	Finding #8: (Moderate): User Access Reviews Not Performed for Systems Supporting the OMV Program	Recommendation: Conduct regular access reviews for OMV and MOVEit.

The background of the slide is a solid teal color with a pattern of wavy, overlapping lines that create a sense of depth and movement. The lines are more pronounced on the right side and fade towards the left.
