CONTRACTS AND RISK ASSESSMENT

DRIVING ON STATE BUSINESS

FILE A CLAIM AGAINST THE STATE

STATE INSURANCE COVERAGE

Attention! Complete a Risk Assessment Prior to Completing an Insurance Requirement Template!

[If assistance is needed in learning how to use this tool for determining contractor insurance requirements, scroll down to: Training on how to use the tool on Workday.](#)

Risk Assessment Tools for Determining Insurance Requirements

After completing the risk assessment, click the appropriate link below the tool to select the insurance requirement template. Use the results from the risk assessment to complete the template. The templates for services and goods contracts and for services and goods **intergovernmental agreements (IGA)** include insurance coverage that may not be applicable to a current situation. The risk assessment will help determine which insurance coverage to request.

Why is this important?

Contractor/Vendor or Grantee is agreeing to an indemnification clause in the contract or grant.

Insurance policy can bring the financial backing to respond to requirements in the contract.

Insurance carriers provide specialized defense attorney and loss control resources.
