To the elected officials who are seriously seeking to increase taxes as we are all dealing with high food costs and energy cost that has put a burden on us citizens. It's extremely unfair to the Oregon public to take hit after hit due to poor management of funds in this State. The burden you put on us has a detrimental effect on us all. The Amount of fees and taxes just keeps piling up on us. Considering we have a very impoverished community and Senior Citizens who barely can make ends meet as a Voter I am asking this body Not to put an extra financial burden on the public. This will only increase goods and services which are already out of reach for many of us.
