Committee: Joint Interim Committee On Transportation
Funding

Measure, Appointment or
Topic: LC 2

The transportation tax(es) being proposed negatively affect every tax paying person in this state. Our politicians and ODOT need to run this state and it's entities like a private business. Take a step back reevaluate and get rid of some of the fluff positions being held. DEI is illegal in the United States of America, regardless of what you call it within this state. These positions, hires and practices should be weeded out and this will also help to bring \$ down in the budget. Advertising high salary administrative positions while talking of laying off the laborers in ODOT is wrong.

Living in southern Oregon, we are not happy funding projects in the Portland area. Most people I know, avoid Portland area, even the airport like the plague. No longer going to concerts or events at the Rose Quarter, we now schedule and drive south to Redding and Sacramento areas.

The governor, not my governor is blind to what Oregon State is really about, and out of touch with the citizens, only seeing what's inside her bubble, or dome.

VOTE NO ON ALL FACETS OF THE TRANSPORTATION TAXES !
