I understand wanting to save jobs and keep facilities open, however, there is a limit on what you can keep passing on to the public. I am taxed out. Start spending wisely and cut costs rather than increase fees and taxes to do things that are not necessary. Case in point: Near the town of Halfway, on Hwy 86, ODOT tore out a culvert and are building a bridge for fish passage. Millions of dollars to allow fish passage on a small stream that goes dry part of the year. The culvert has sufficed for over 50 years. Use money smarter. I am opposed to the fee and tax increases the governor is proposing. The legislature needs to reign her in. Nearly doubling vehicle registration is absurd. Many Oregonians cannot afford increases. I am 100% confident you can cut ODOT expenses and still provide necessary services. VOTE NO ON THESE PROPOSED INCREASES!!!!
