As a fixed income disabled veteran i oppose this bill. Its hard enough to live in Oregon without these tax hikes and vehicle fees. Fuel cost are already high! Oregon is really expensive; housing, food GAS ect... I travel to rural areas of the state, with taxing fuel even higher makes it unaffordable for these lower income families areas of our state. I grew up on the oregon coast, which has higher prices then the larger cities. How are these type of people which make less money to live on... now have to figure out how to put gas in their cars or buy food and pay bills. I personally know this will effect my family in a negative way, also all the 1000s of veterans all over the state. Please, for the sake of lower income families, veterans and the rural community members, vote no on these outrageous taxes. Thank you
