Topic: LC 2

I strongly oppose this governors proposal to raise our taxes. Oregon State is already amongst the Highest taxing States in the Nation. Travel East approximately 4 Hrs, and you will find fuel significantly cheaper. This States Legislators must learn to Balance, and Budget the same as all others. You cannot be irresponsible, and just call for more money from the working class that are already struggling in this very expensive day, and age. Oregon has become a Nanny State for the Lazy. They need to cut the young, and able bodied off of the EBT system. Stop proving abortions for any, and all at our expense. Make cuts where waste is proven. Do what is right for all in this State. This over taxation is causing great harm to the middle class Earners. We are keeping all of Oregon afloat, and getting short changed in our own lives financially. Meanwhile Tina Kotek continues to Take and give to the Lazy. No more Taxes. Financial Responsibility with the Revenues this State Currently has. Make cuts where Necessary. And not the ODOT Employees. Tina Kotek continues to show her Incompetence.
