As a lifelong Oregonian and a recent retiree I am horrified at the path our state is taking toward making it so expensive for people on a fixed income to live even a simple life. We absolutely cannot afford more taxes and higher auto fees. I remember legislation passing that did not allow more taxes without voter approval. What ever happened to it? This Democratic government has shred to pieces any confidence from the conservative residents of this state. You are all bullies and it makes me sick to think what kind of place my grandchildren will have to live in. They will not continue to fork the dollars over forever. I'm recommending moving and know many have already left the state because of the tax and spend bullies who now don't even want to be held accountable. My advice to our legislators, make Oregon affordable!! For everyone!
