I'm opposed to the Democrat tax package funding ODOT. Our taxes and fees are some of highest in the US. Many of us seniors that are on fixed incomes can no longer afford to live in Oregon. ODOT has been over budget and mismanaged for years. Spending \$100 million dollars for electric charging stations for electric vehicles that no one wants to buy or drive is ridiculous and wasteful. Our roads in South Tillamook County are crumbling. Dodging potholes has become a sport here on the coast. Spending millions more for DEI programs is also wasteful and a slap in the face to average Oregonians. Cut management and find money in the emergency fund and stop with the raising of taxes and fees.
