Measure, Appointment or Topic:	LC 2

It is difficult to live in general without the continued tax increases in oregon the last several years with Kotek expecting Oregonians to make up for failed leadership. We have told you no numerous times yet she still doesn't listen. Oregonians are tired, overworked, over taxed and barely getting by. No new taxes! Manage the exorbitant amount of money you have from Oregon tax payers as being one of the highest taxed states in the nation. With some of the poorest roads and infrastructure, highest homelessness and unemployment rates in the nation.

Perhaps instead of asking for more money and ignoring your constituents you work with republicans, as you've clearly ignored and come up with real time solutions that don't make Oregonians pick up the slack. You forget who you work for kotek and elections are coming up quick. It's time you learn to listen and stop pushing your own agenda that do not benefit the people who voted you in. You claim to want to help the poor and middle class yet you make them bare the burden with failed policies and once again poor leadership.
