Topic: LC 2

Please don't continue to hurt lower class, working class, and rural communities families by raising taxes. These increases also have ripple effects on goods and services across the board, actually think long term for once. This state already has one of the highest gas taxes in the nation. You need to practice fiscal responsibility and make the cuts cut elsewhere and move the funds, not pass the burden of your incompetence. This situation could have and should have been avoided, but your priorities are based on woke ideology and not good governance. The proper thing to do would be to out this to a vote, but you won't because you know it won't pass. You're turning my home into California and making this state less, it's seriously sucks because I grew up in the PNW and I never want to leave, but with the rising costs of everything and businesses leaving, on top of everything else, you guys make it tough to be here and this only makes it worse. Actually listen to your people and what's right for once.
